Achieve better outcomes through better training.

Learn with Harry is a suite of next-generation training products that may help your organization reduce MSHA citation rates and decrease lost-time injuries. Encourage a safety culture on your worksite by providing the fundamental training that your workers need to stay safe!

The Learn with Harry suite includes software and wrap-around curriculum that can be tailored to meet your organization’s needs. Using advances in serious games and augmented reality, Learn with Harry will give your trainers the capabilities that they need most:

- **Continuous training.** Use a holistic approach with daily activities that hone workers’ situational and operational awareness skills.
- **Competency evaluation.** Create, record, and analyze safety and operational improvements in each person, crew, and shift.
- **Customizable content.** Customize training modules and capabilities for each site’s workers and standard operating procedures.
- **Dynamic activities.** Allow workers to solve problems and use best practices on real work sites under ever-changing conditions.
- **Communities of practice.** Emphasize team activities, communication, and individual responsibility in every aspect of safety.
- **High worker engagement.** Create an absorbing, personalized experience that increases accessibility and engages workers in safety training.

Our software supports a variety of training situations, environments, and technologies.

Harry's Hard Choices

let your workers compete in a role-playing scenario while you track and evaluate safety competencies. Featuring a detailed mine disaster, Harry's Hard Choices addresses key practices to keep workers safe during emergencies, while also satisfying the guidelines of CFR Part 48 for new miner and annual refresher training.

Addresses numerous Part 48 subjects:
- Evacuation / Sheltering / Fire warning
- Self-rescue / Respiratory devices
- Recognition & avoidance hazards
- Prevention of accidents
- Worker health and safety
- Intro to work environment
- Mine gases / Ventilation
- Roof / Ground control
- Transportation controls
- Communication systems

Intricately detailed worksites feature realistic activities, distractions, and hazards.

Addresses top MSHA citations:
- Guarding of moving machine parts
- Guards in place while operating
- Damaged, inadequate electricals
- Safe travelways to work areas
- Berms and guardrails around drop-offs
- Housekeeping, orderly work areas
- Haulage safety defects
- Horns and backup alarms

Features key capabilities:
- MSHA’s “Rules to Live By”
- Team-based play with coworkers
- Common communication problems
- Liability: “You see it, you own it!”
- Scenarios for sand, gravel, and cement
- Customizable to your workers and site

Learners face a variety of hard choices — and often unexpected consequences.

Harry's Hazardous Day

A new, engaging approach to workplace examination and hazards training, Harry's Hazardous Day gives your trainers the tools they need to teach good inspection practices, explore worker rights and responsibilities, and hone situational awareness skills. Harry's Hazardous Day features a story-driven scenario with realistic environments that change over time and many hazards that workers encounter every day.

Intricately detailed worksites feature realistic activities, distractions, and hazards.

Addresses top MSHA citations:
- Power ed haulage
- Electricals
- Machinery
- Fall of roof, back, ribs
- Slip or fall of person

Features key capabilities:
- MSHA's “Rules to Live By”
- Team-based play with coworkers
- Common communication problems
- Liability: “You see it, you own it!”
- Scenarios for sand, gravel, and cement
- Customizable to your workers and site

Learn with Harry is an innovative suite of training products for mine safety.

Harry's Fatalgram Simulator

Discover a new way of teaching MSHA Fatalgrams! Harry's Fatalgram Simulator uses interactive short stories, where learners see accidents unfold and then change outcomes through best practices. With Harry's Fatalgram Simulator, your trainers can better illustrate the pinch zones, communication breakdowns, distractions, and blind spots that frequently lead to accidents. Satisfies MSHA requirements for annual refresher; may also be customized to your organization’s morning tailgate.

Covers many types of fatalgrams:
- Powered haulage
- Electricals
- Machinery
- Fall of roof, back, ribs
- Slip or fall of person

Features key capabilities:
- MSHA’s “Rules to Live By”
- Team-based play with coworkers
- Common communication problems
- Liability: “You see it, you own it!”
- Scenarios for sand, gravel, and cement
- Customizable to your workers and site
